

**18s2 - group assignment**  
**(CLASS DIAGRAM) - GROUP HAM**  
**Hannah C, Abrar D, Milla K**

## STUFF WE DON'T NEED

CentreProfilePage
- centreName: String - location: String - customerRating: int - RatingSystem: RatingSystem - HealthProviders: list<HealthProvider> ---- photograph, booking ----
+ BookAppointment(): float + ViewProviderProfile(): float + GiveRating(): float

ProviderProfilePage
- providerName: String - customerRating: int - HealthCentres: list<HealthCentres> - RatingSystem: RatingSystem
+ BookAppointment(): float + ViewCentreProfile(): float

SearchSystem
- searchByCentreName: String - searchByProviderName: String - searchByLocation: String - searchByServiceType: String - search: String
+ DisplayResults: float

**One last thing, your diagram doesnt seem to be keeping track of appointments in any way, make sure to add that (as well as booking appointments).**

**These class also wont need to login() or ViewAppointHistory(),\_ these functionalities should be provided by your system classes.**

Text

### need to add in

- log in

--> log in added into UserManager class

- something that keeps track of the appointments?

--> added in AddAppointments in AppointmentsHistory class
